

eptos™ OpenAPI JSON Services

Welcome to a new age of system integration and management

Introducing eptos™ OpenAPI JSON Services – a tool for your eptos™ system that enables an easy system integration.

By enabling the integration of your eptos™ product master data into your enterprise applications, we offer seamless access and efficient utilization of your data based on a service-oriented architecture.

Integration of master data into all enterprise applications – easy & fast

eptos™ OpenAPI JSON Services is a powerful tool that helps users to efficiently manage product descriptions, assigning properties, values, and classes from one consistent vocabulary in all enterprise systems by enabling the integration of the eptos™ product master data into all enterprise applications. This ensures clear, uniform, and structured product data across all enterprise applications, eliminating the need for ad hoc mappings or managing non-existing vocabularies.

eptos™ OpenAPI JSON Services Add-On utilizes REST architecture, allowing companies to optimize the way they describe, exchange, and manage products and services electronically. A seamlessly integrated system where product master data repositories are interconnected, supports informed decision-making and promoting efficiency throughout the whole company.

Supported eptos™ Manager

eptos™ Dictionary Manager
