

Datasheet

eptos™ Search Engine

eptos™ Online Master Data Repositories support companies and organizations to work with consistent master data throughout the organization.

The eptos™ Search Engine is a web based, high performance search engine for product and material master data which can be provided and distributed within your corporate network.

eptos™ Product Master Data Repository

Today, companies deploy a wide range of IT-systems to support business processes and exchange information. One of the critical success factors is the reliable administration and electronic exchange of materials master data, product master data and services master data between systems within the organization as well as to suppliers and customers. Our global markets require the support of increasing numbers of different language versions.

Errors due to misunderstandings, wrong interpretation or translations of words, features or symbols result in high expenses and drive product and service prices.

eptos™ Product Master Data Repositories support companies and organizations to overcome these problems and support the development and provision of corporate wide consolidated and multi-language product master data. Consistent master data will be provided to all connected application systems (ERP, CAx, PDM, eCatalogs, etc.). Consolidated product master data reduces the complexity of your business process.

eptos™ Search Engine

The eptos™ Search Engine is a web based, high performance search engine for product and material master data which can be provided and distributed within your corporate network.

Target group

eptos™ customers who desire fast and easy access to their product and material master data.
