eptos™ Flex. Classification for SAP

eptos™ Online Master Data Repositories support companies and organizations to work with consistent master data throughout the organization.

eptos™ Flex.Classification for SAP supports the creation and maintenance of classification data in SAP. This includes master data as well as valuations.

eptos™ Flex. Classification for SAP

eptos™ Product Master Data Repository

Today, companies deploy a wide range of IT-systems to support business processes and exchange information. One of the critical success factors is the reliable administration and electronic exchange of materials master data, product master data and services master data between systems within the organization as well as to suppliers and customers. Our global markets require the support of increasing numbers of different language versions.

Errors due to misunderstandings, wrong interpretation or translations of words, features or symbols result in high expenses and drive product and service prices.

eptos™ Product Master Data Repositories support companies and organizations to overcome these problems and support the development and provision of corporate wide consolidated and multi-language product master data. Consistent master data will be provided to all connected application systems (ERP, CAx, PDM, eCatalogs, etc.). Consolidated product master data reduces the complexity of your business process.

eptos™ Flex. Classification for SAP

With eptos™ Flex. Classification for SAP you transfer consolidated product master data and classification data from eptos™ system to your SAP systems.

This includes master data as classes, properties or value lists as well as valuated material master data. By means of eptos™ - Flex. Classification for SAP data elements can be easily created, changed or deleted in SAP.

Functionality includes:

- Creation, change and deletion of classes, properties and valuations in SAP
- Creation of class and property hierarchies
- Overwrite properties and valuations
- Reference properties for database attributes
- Presentation units of measure
- Import of data based on standard eptos™ XML interfaces
- Import of data via webservices in SAP or SAP XI/PI

Features

- Processing released data from eptos™ using eptos™ XML interface
- Easy and flexible processing of classes, properties, value lists, valuated data, etc. in SAP
- Integration of SAP BAPI
- Several processing modes available (create, create/change, delete/change)
- Simulation mode available (plausibility check, complete check)

Target group

eptos™ customers who connect their eptos™ system to SAP transferring and updating dictionary data using an XML interface.

Requirement

- eptos™ Base Module
- eptos™ Dictionary Manager
- eptos™ Template Manager
- eptos™ Item Manager

Our offer

- Software-license
- Maintenance and support contract
- Documentation
- Training, workshops and webinars
