PARADiNE

eCl@ss BASIC and ADVANCED

Datasheet

eCatCreator

eCatCreator supports easy and fast creation of eCl@ss based electronic catalogs in BMEcat or ISO29002-10 data format.

eCatCreator

eCatCreator

Electronic catalogs provide you and your customers an up-to-date overview of individual offers. Standardized product master data facilitate the creation and exchange of electronic catalogues and reduces product master data maintenance.

eCatCreator from Paradine enables you to easily and quick create electronic catalogs based on the **eCl@ss directive for product data in BMEcat 2005.1 format**. eCatCreator also supports templates according to ISO 22745-30 as well as eCl@ss workflow based on ISO29002-10 and ISO29002-31.

eCatCreator supports both eCl@ss BASIC and ADVANCED data model including mapping of valuated data. Users are able to create catalogs in both formats avoiding redundant data capturing.

eCatCreator is a cost-saving PC-based application to easily create and maintain high-quality electronic product catalogs.

Features:

- Create and provide **electronic product catalogs based on eCl@ss lists of properties**
- Considering eCl@ss directive for product data in BMEcat 2005.1 format
- Supports **eCl@ss** data model in **BASIC and ADVANCED** format (including aspects, blocks, cardinality, polymorphism, Units etc.)
- Supports **eCl@ss Releases 6.0 and above**
- Read and apply eCl@ss templates as well as private catalog templates
- **Switch** between eCl@ss **BASIC** and **ADVANCED including takeover of content**
- Create **electronic catalogs in BMEcat 2005.1 and ISO 29002-10 data format**
- **Support of GS1-XML-CIN format on request**
- **Export** catalog data in **xls** format
- **Export** datasheets in **pdf** format
- Functionality to compare products
- Supports different pricing models and ordering information
- **Loading** dictionaries in **OntoML format** (according ISO 13584-32)
- Creation of **multilingual catalogs**
- Operating System: MS Windows®

Target group:

- Product marketing and sales
- Product master data management
- Product management
- Product classification and product description
- Capturing material- and MRO-material-data
- Creation of technical product catalogs for engineering
- Spare parts catalogs
- Software developers – eCatCreator is THE **eCl@ss Reference implementation** for the eCl@ss ADVANCED data model

Our offer:

- Software-license
- Maintenance and support contract
- Documentation
- Workshops and webinars
