eCI@ss Introduction

Thinking of introducing eCI@ss?

In this seminar you will get an overview about eCI@ss and learn methods for a structured implementation. Expand your knowledge of the advantages and benefits for your company on the basis of best practice implementations.

Goals

This seminar gives an overview to eCI@ss, presentation of eCI@ss organization, data model, and the possibilities of use in business processes. Based on best practice implementations you will get an idea how you can successfully use eCI@ss in your organization. Learn how to improve your internal processes and the electronic exchange of data through the use of eCI@ss with your business partners. If necessary you will see how you can take part in further development of the eCI@ss standard.
