Datasheet

eptos™ Business Party Manager

eptos™ Master Data Repositories support companies and organizations to work with consistent master data throughout the organization.

eptos™ Business Party Manager enables administration and exchange of information regarding business parties, such as vendors, producers, suppliers or customers, to support transparency and data governance.

eptos™ Business Party Manager

eptos™ Product Master Data Repository

Today, companies deploy a wide range of IT-systems to support business processes and exchange information. One of the critical success factors is the reliable administration and electronic exchange of materials master data, product master data and services master data between systems within the organization as well as to suppliers and customers. Our global markets require the support of increasing numbers of different language versions.

Errors due to misunderstandings, wrong interpretation or translations of words, features or symbols result in high expenses and drive product and service prices.

eptos™ Product Master Data Repositories support companies and organizations to overcome these problems and support the development and provision of corporate wide consolidated and multi-language product master data. Consistent master data will be provided to all connected application systems (ERP, CAx, PDM, eCatalogs, etc). Consolidated product master data reduces the complexity of your business process.

eptos™ Business Party Manager

eptos™ Business Party Manager enables administration and exchange of information regarding business parties, such as vendors, producers, suppliers or customers, to support transparency and data governance.
